PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with hands-on experience in CI/CD pipeline design, cloud infrastructure automation, containerization, and deployment workflows. Proficient in Jenkins, Docker, Kubernetes, AWS, and Linux administration, with a strong foundation in Infrastructure as Code (Ansible, Terraform), Git version control, and configuration management. Adept at resolving production incidents, automating release processes, and collaborating within Agile teams. Completed a master's program from Simplilearn, gaining hands-on experience in DevOps tools, CI/CD pipelines, containerization, cloud technologies, and deployment workflows.

CERTIFICATIONS

Masters Program – DevOps Engineer | Simplilearn Certified | 2026

- DevOps Training
- CI/CD with Jenkins
- Docker DCA
- Certified Kubernetes Administrator
- AWS Developer Associate
- Agile Scrum Master
- Linux Training

WORK EXPERIENCE

Technical Operations Lead

Nov 2025 – Present

Product Pursuit, Bengaluru, Karnataka | Remote, Part-Time

- Managed end-to-end CI/CD pipeline workflows using Jenkins, automating build, test, and deployment processes for a Flask-based web application with real-time messaging and e-commerce functionality.
- Deployed application infrastructure on AWS EC2 and configured domain routing via GoDaddy DNS to ensure production availability.
- Led deployment operations for iOS and Android Flutter applications to the Google Play Store and Apple App Store, managing build pipelines and release versioning.
- Collaborated cross-functionally on frontend improvements and UI design using Figma, supporting development and design alignment.
- Promoted from intern to DevOps Engineer within 2 months based on strong performance in deployment operations and development tasks.

Backend & DevOps Intern

Nov 2025 – Feb 2026

LinkedOut, Delhi, India | Remote

- Architected a scalable backend using Firebase (NoSQL) for authentication and real-time data management, integrated with a React frontend for full-stack functionality.
- Implemented secure user authentication including email/password login and Google OAuth.
- Deployed the application on Google Compute Engine with automated CI/CD pipelines in Jenkins for consistent build and release management.

DevOps Engineer Intern

Jan 2025 – Jun 2025

Blue Planet Info Solutions, Pune, Maharashtra | Remote

- Executed cloud migration of Jenkins CI/CD infrastructure from on-premise to AWS, reducing pipeline downtime and improving build reliability.
- Deployed .NET ASPX applications on IIS across staging and production environments, supporting reliable release pipelines and configuration management.
- Automated Android application releases to the Google Play Store using GitHub Actions, significantly reducing manual deployment effort.
- Responded to high-priority production incidents, performing root-cause analysis and implementing corrective measures to maintain system uptime.
- Authored SOPs and internal wikis for infrastructure and automation processes; managed Git workflows and branch policies for code collaboration.

PHP Developer – Freelance

Oct 2024 – Jun 2025

Independent Contractor | Remote

- Developed a secure quiz web application with anti-cheating measures including tab-switch prevention and unauthorized navigation control.
- Designed and improved the application UI using Figma, delivering a responsive and user-friendly interface.

PROJECTS

Jenkins–Slack CI/CD Notification System

- Implemented real-time Slack integration with Jenkins to post build statuses, pipeline logs, and deployment notifications; documented the process for adoption across multiple teams.

DevSecOps for Microservice Applications

Ongoing

- Architecting a microservice-based communication gateway (SMTP & WhatsApp Business API) using Docker containers with isolated scaling, Prometheus, and Grafana for production observability.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, Route53), Google Compute Engine, Microsoft Azure, Firebase

CI/CD & DevOps Tools: Jenkins, GitHub Actions, YAML Pipelines, Ansible, Terraform, SOP Documentation, Incident Management

Containerization & Orchestration: Docker, Kubernetes (Learning), AKS (Learning)

Version Control & OS: Git, GitHub · Linux, Windows Server (IIS)

Languages & Frameworks: Python, Bash, PHP, JavaScript · Flask, React (Integration)

Databases & Monitoring: MongoDB, Firebase, MySQL · Prometheus, Grafana

Methodologies: Agile, DevOps Lifecycle, Configuration Management, Build & Release Management

EDUCATION

B.E. in Computer Science & Design — CGPA 8.1

Dec 2022 – Jun 2026 (Expected)

Tontadarya College of Engineering, Gadag, Karnataka

PUC – PCMB — 72% | SSLC — 84.07%

2020 / 2022

Govt. PU College & Shri Parshwanath English Medium School, Gadag, Karnataka

ADDITIONAL INFORMATION

Languages: English, Hindi, Kannada

Soft Skills: Communication, Problem-Solving, Analytical Thinking, Collaboration, Time Management, Adaptability
